NOTES & NEXT STEPS

HOW THIS COULD LAUNCH

ABOUT THIS CONCEPT

- Product images are AI-generated mockups (GPT Image) built from the club crest. They show the direction, not exact production results.
- Costs, margins, minimums and lead times are planning estimates for small runs (about 25–100 units), based on typical US decorators and promo suppliers in 2026. They are not quotes.
- Production needs the club's vector crest artwork (AI/EPS/SVG) and supplier proofs before ordering.

PRICING LOGIC

- Retail is set near typical youth-club prices so families see fair value.
- Margins at the planned costs are roughly 45–80%. Proceeds could support club priorities such as scholarships or equipment, if the board chooses.
- Youth sizes are priced a few dollars lower where noted.

SUGGESTED NEXT STEPS

1. Board picks a launch set (suggested: hoodie, fan tee, cap, scarf, decal).
2. Request quotes and samples from 2–3 local or online decorators.
3. Choose a model: pre-order windows (low risk, no inventory), print-on-demand, or a small stocked run for events.
4. Open the online shop on the club website, run from the new admin (products, sizes, inventory, orders).
5. Launch with a pre-order window before the winter all-star games, with pickup at the AGM or practices.
